Magnetic Pin Finishers

Magnetic pin finishers allow for the deburring and burnishing of small and/or intricate non-magnetic parts that are not conducive to normal finishing techniques. Bel Air's magnetic pin finishers have 50% more magnets than comparable models on the market, making them the best solution to your small parts deburring problem.

Powerful magnetic force moves media, solution, and parts in a circular motion. Rotation of the magnets agitates the magnetic pin media, which creates the deburring action.

All units are supplied with a see-through acrylic bowl & lid, as well as stainless steel pins. Model FMP4 includes auto-reverse and variable speed. The larger models, FMP-735 and 750, have programmable control panels with LCD panels, speed control, and timers for both clockwise and counter-clockwise cycles.

Larger models available.

Model	Bowl Height (inches)	Bowl Diam. (inches)	Ring Capacity	Shipping Weight (lb)	Voltage/Phase
FMP-01	6	6.5	30-40	15	110/1 Phase
FMP-02	5	8.5	100	25	110/1 Phase
FMP-04T	6	11	300	98	110/1 Phase
FMP-04TA	6	11	300	98	220/3 Phase

Larger Models

Model	Dimensions (inches)	Tank Dimensions (inches)	Shipping Weight (lb)	Voltage/Phase
FMP-735	23 x 26 x 34	15 x 16	220	220/1 Phase
FMP-750	29 x 30 x 36	21 x 23	385	220/1 Phase
