- Optimized disc geometry for ideal rotation
- Digital timer for easy time adjustment
- Specially developed gap technique
- Low heat generation
- Includes media starter kit
- Compact and lightweight
- 110/220v single phase

Benchtop Unit with Interchangeable Bowls

Bel Air's latest development in SL product range is specifically designed for the smallest batches. A high-polish surface finish is possible by using the proper combination of cut and polishing media.

Heavy-duty urethane bowls twist off with ease, and can be swapped and emptied just as easily. The wet bowl includes a drain connection and tube.

Optional accessories include an additional wet bowl, dosing pump with container, bowl cover, and a sturdy aluminum extrusion table/frame system.

Model	Height (mm/in)	Width (mm/in)	Depth (mm/in)	Volume (Liters)	Weight (kg/lbs)
