

FINISH•MASTER™

EconoVibe BIS Series

■ FM-BIS-7

BIS Series with Internal Separation and Variable Speed

Bel Air EconoVibe BIS Series vibratory finishing machines all feature heavy steel bases, outer bowls with a durable high-wearing urethane lining, and internal parts/media separation. While inexpensive, all FM-BIS models boast heavy-duty motors, and are capable of use with steel processing media. These machines are rugged and heavy-enough to sit on the floor and do not require mounting bolts.

EconoVibe FM-BIS Series

EconoVibe FM-BIS Series

ECONOVIBE BIS SERIES - TECHNICAL SPECIFICATIONS

Features:

- Adjustable amplitude
- Manual dam & extended screen
- Inverter Duty Motor w/ variable speed control via frequency inverter
- Flow-through Drain
- Media unload parts

Model	Depth (In.)	Diam. (In.)	Height (In.)	Volume (Cu. Ft.)	Weight (lbs.)	Motor HP	Electrical
