

Rapid Resin Cleaner

A **GREEN** way to remove SLA resin!

Resin Removal

Resin Removal

■ **MB-303-5**

Bel Air's MB-303 rapid rinse 3D prototype resin cleaner is an environmentally safe alternative to trichloroethylene, TPM, acetone, isopropyl, and other hazardous and flammable solvents. This **green** stereolithography (SLA) rinse agent will remove Ciba-Geigy, Allied Signal, and 3D Systems rapid prototype resins, among others. As a bonus, MB-303 also dissolves grease, oil, paint, adhesives, and non-prototype resins. Its high dielectrical strength makes it an excellent electric motor degreaser as well. Use at 100% concentration. Available in 5 gallons or 55 gallons. Average cycle time is 30 minutes and product lasts for months.

Rapid Resin Cleaner

■ **FM-M1134 Dunker**
